.

ADDRESS.

ADVERTISEMENT.

In framing this Catalogue, the object has been to render it a more useful Index of the contents of the Library, than it would otherwise have been, by copying the title page of every book at length, and by inserting, in the same alphabetical arrangement, the separate treatises of the various collections which it contains.

Medical and Chirurgical Society's House, 3, Lincoln's Inn Fields, Dec. 11, 1816.

Judgement of Diseases from the Decumbiture of the Sick, much enlarged. 1. From Aven Ezra by Way of Introduction. 2. From Nowel Duret by Way of Direction. Wherein is laid down the Way and Manner of finding out the Cause, Change, and End of the Disease; also whether the Sick be likely to live or die, and the Time when Recovery or Death is to be expected: with the Signs of Life or Death by the Body of the sick Party, according to the Judgement of Hippocrates. Whereunto is added, a Table of Logis-

Hermes Trismegistus upon the first Decumbiture of the Sick, shewing the Signs and Conjectures of the Disease and of Life and Death by the good or evil Position of the Moon at the Time of the Patients lying down, or demanding the Question. Infallible Signs to know of what Complexion any Person is whatsoever. With a compendious Treatise of Urine. Fourth Edition. 8vo. Lond. 1671

Last Legacy, left and bequeathed to his dearest Wife, for the public Good; being the choicest and most profitable of those Secrets, which while he lived were lockt up in his Breast, and resolved never to be publisht till after his Death, containing sundry admirable Experiences in several Sciences, more especially in Chyrurgery and Physick. winwen zur Beschränkung oder gänzlichen Tilgung der Kriegspast, und mehrerer anderer Menschenseuchen. Wien. 1815

HILL (Oliver) The Fifth Essay of D. M. a Friend of Truth and Physick, against the Circulation of the Blood. In two Parts. The First shewing its Absurdity and Impossibility three several Ways: 1. by the Disagreement and Lameness of the Reasons its own Authors give for it; 2. by many strong Demonstrations against it; 3. by making void all the Causes they assign of this pretended Effect; and this last, by shewing, that there is no Use in Nature for such Circulation, nor any Cause efficient capable to produce it, and to cause it to exist. The Second shews the true Cause of the Motion of the Heart, and the Blood and Arteries, by that which constitutes Life, to wit, the Spirits making a Flash

in the left Ventricle, and a Puff which swells the Heart at every Pulsation, and pervades and moves the Blood. 8vo.

Lond. 1700-1701

The Fifth Essay of Nine upon several Subjects: this being against the Circulation of the Blood. In two Parts; the first being a full Refutation of that blind Hypothesis; the second shewing the Cause of the Pulse, or the Beating of the Heart and Arteries, and of the Motion descry'd in the Blood and its Vessels, by a Way more agreeable to Reason and to Nature, than that of Circulation. A second Edition of the former Work.

A Rod for the Back of Fools: in Answer to a Book of Mr. John Toland, called Christianity not mysterious; (in which Answer, Trinity in Unity is made out to Reason and Common Sense) and to the Lecture of one Dr. Joseph Brown, taken from the Author's Book against the Circulation; and to the Answer of one Mr. John Gardiner, Surgeon, to that pretended Lecture. 8vo. ib. 1702

HILL (John, M.D.) History of the Materia Medica; containing Descriptions of all the Substances used in Medicine, their Origin, their Characters when in Perfection, the Signs of their Decay, their Chymical Analysis, and an Account of their Virtues, and of the several Preparations from them now used in the Shops. 4to.

Ignota Febris; Fevers mistaken in Notion and Practice: shewing the frequent fatal Consequents thereof: herein traversing the dissenting newe Hypotheses of some late Writers, and erroneous Opinions of antique Authors: with Remarks upon Bleeding, Blistering, Juleps, and the Jesuits Pouder in Fevers. 8vo. ib. 1698

Morbus Polyrhizos et Polymorphæus. A Treatise on the Scurvy. 12mo. ib. 1666

modern Practice of Physick examined, stated, and compared. The Preparation and Custody of Medicines, as it was the primitive Custom with the Princes and great Patrons of Physick, asserted and proved to be the proper Charge and grand Duty of every Physician successively. The new Mode of prescribing and filing Recipes with Apothecaries, manifested an imprudent Invention and pernicious Innovation, demonstrated from the treble Damage and Disadvantages that arise thence to Physician, Patient, and the Medical Science: with enforcing Arguments for a Return and general Conformity to the primitive Practice, all Objections to the contrary answered and fully cleared.

Disease, Running of the Reins, discovering the unknown Symptoms and subtle Nature of this surprising Malady; with the different Judgements of most eminent Physicians hereupon, and the various Methods of Cure practised in

Plague of 1665. Collection of very valuable and scarce Pieces relating to the last; viz. 1. Orders drawn up and published by the Lord Mayor and Aldermen of the City of London to prevent the Spreading of the Infection. 2. An Account of the first Rise, Progress, Symptoms, and Cure of the Plague, being the Substance of a Letter from Dr. Hodges to a Person of Quality. 3. Necessary Directions for the Prevention and Cure of the Plague; with divers Remedies of small Charge, by the College of Physicians. 4. Reflections on the Weekly Bills of Mortality, so far as they relate to all the Plagues which have happened in London from the Year 1592 to the great Plague in 1665; and some other particular Diseases: with a Preface, shewing the Usefulness of this Collection, some Errors of Dr. Mead, and his Misrepresentations of Dr. Hodges and some Authors: to which is added an Account of the Plague at Naples in 1656, of which there died in one Day 20,000 Persons: with the Symptoms that appeared upon Dissection, and the approved Method of Cure. Second Edition.

Lond. 1792

TENNENT (John) Physical Inquiries on the Use of Acids in the West Indies, and on the Cure of the Fever prevalent there; with Remarks on a Letter to a M.P., signed "Philanthropos." Svo. ib. 1749

- An Epistle to Dr. Richard Mead, concerning the Epidemical Diseases of Virginia, particularly a Pleurisy and Peripneumony; wherein is shewn the surprising Efficacy of the Seneca, Rattlesnake Root, in Diseases owing to a Viscidity and Coagulation of the Blood, such as Pleurisies and Peripneumonies, these being epidemick and very mortal in Virginia, and other Colonies on the Continent of America, and also the Leeward Islands: to which is prefixt a Cut of that most valuable Plant, and an Appendix annexed, demonstrating the highest Probability, that this Root will be of more extensive Use than any Medicine in the whole Materia Medica, and of curing the Gout, Rheumatism, Dropsy, and many nervous Diseases. Edin. 1742 12mo.
 - -- Physical Disquisitions, demonstrating the real Causes of the Blood's Motion, Rarefaction, and Stagnation, and that the Cure of Fevers, acute and chronic Diseases in general, can be effected with greater Certainty than by the established Rules of the Practice of Physic. Svo. Lond. 1745
 - Reprieve from Death, in two Physical Chapters. 1. Objections to the Use of Vinegar to cure the Fever in the West Indies. 2. Reasons why all Medicines should be freely ib. 1741 published. Svo.
 - —— Truth stifled, or The Case of J. Tennent on his Discovery of the farther Efficacy of the Snake Root, and Enquiries on the Venom of the Rattlesnake, and Observations

on the Use of the Root in the Yellow Fever, and against the Use of Vinegar and Acids. 8vo. Lond. 1741
